SAVVY
analytIQs

Build interview guides quickly, consistently, and without errors using the Savvy Interview Guide tool. The user-friendly interface allows you to customize the needs for your specific role within bounds set by your organization.

EASY TO USE

No need for new technology; Savvy Interview Guides uses only Word and Outlook which makes onboarding and adoption simple.

TAILORED TO YOU

Savvy AnalytIQs will collaborate with you during the onboarding process to customize the tool to fit with your organization's competency model, interview questions, and rating scales.

### FLEXIBILITY WITHIN STANDARDS

Users can customize which competencies, questions, and question types to use for each guide but are limited to what is available for each job. Interview Guides remain fully editable for special edits needed outside of the standard options.

INTERVIEW GUIDES IN SECONDS

Quickly make ready-to-use interview guides by filling in basic information and selecting a handful of options. Interview guides will always be consistent across users, adhere to the organization standards, and be free of errors.

Use the Interview Guide Builder to instantly create a ready-to-use guide
